REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW, THURSDAY, FEBRUARY 28th, 1929 Number 52

Hector Lang Again Supported By House

Unanimously Support His Resolution For Change in Curriculum

Hector Lang, M. L. A. for this constituency, scored his second successive victory in the legislature on Tuesday afternoon when the house unanimously endorsed the following resolution which appeared under his name:

"That i the opinion of this assembly the course of studies prescribed for secondary schools should again be referred to the curriculum committee and that the committee should be asked to consider the advisability of further lightening the content of the course and of making the requirements for normal entrance and university matriculation uniform."

While Mr. Lang's resolution was agreed to unanimously and drew not one word of protest from any section of the House, yet it did not pass until nearly two hours had been consumed by various speakers in advancing their views on education in general and the curriculum in particular.

Hon. Perren Baker, minister of education, was the warmest supporter of the resolution and said that in supmitting it, Mr. Lang had brought forward an idea he already had formed in his own mind.

Moving his resolution, Mr. Lang pointed out that, during the last 25 years enrollment in Alberta secondary schools had increased by five times and thought this spoke well for the additional interest being taken by the youth of the country in education and the development of citizenship in general. It was his opinion that the curriculum for normal entrance and matriculation were far too heavy for the three years allowed in which to pursue it. H put forward an earnest plea for the devotion of greater time to physical training and gave as evidence of the fact that the curricul m as it stands is overcrowded, the crowding out of physical training. Therefore neither teahers nor pupils were given time to devote to this most important phase of development. In addition to having no time for recreation such as sport, the average student had no time for art, music or other cultural pursuits.

A BAD MIXUP

In the investigation into charges made against the Bracken government in Manitoba, it was brought out by a director of theWnnipeg Electric Company that all three political parties in that province, Farmer, Liberal and Conservative, had been paid money fo a campaign fund by the Elctc company.

It is the most natual thig in the world for an organization, a company or an individual to give tnje, talent and even money in support of a political party or candidate, or a football, baseball or hockey team, any of which they are backng and are anxious to have win out. But when a corporation or individual subscribes to all contesting parties it looks as though there is an axe to grind, or in other words, an effort to buy favors. The one is all right the other is all wrong. The investigation at Wnnipeg is liable to lead to a nice mix up.

WHEAT POOL TO MAKE AN INTERIM PAYMENT

An interim paymnt on the 1928 crop, totalling more than twenty-si million dollars, will be distributed to Wheat Pool members of Wester Canada. The payment is twelve cts per bushel on wheat grades one to five and on flax and rye.

The Alberta Pool paymnt of $6,410,955.92 is on fifty-five million bushels of wheat total. The total amount distributed is $26,198,923.92.

Interesting Picture Coming To Redcliff

"A Dog of The Regiment," starring Rin-Tin-Tin, comes to the Cameo next Monday. The story begins in Germany in peace time during which o close friendship develops between Rinty,, his German mistress and a young American. War makes the friend an emeny.This is the most exciting of all Rin-Tin-Tin's pictures and shows him as the flying hero.

China—mysterious, ancient, inscrutable—has awakened in the past two years, and with a blast of war lanced into the world's consciousness. China is on every front page! Food, riots, river pirates, starvaton — co'erful, thrilling, dangerous, surging activity, have intrigued America. A "Shangha Scandal" the first authentic tale of the new China, will be shown at the Cameo, Th rsday, Marc h 7th.

There was a quiet session of the Town Council last Monday evening.

As Council met the previous Monday there was very little business to attend to. Most of the time was taken up with reviewing rents now being paid hoses belonging to the town. It has been the opinio of coucillors for some time that these rents are too low. After going over the list several rents were raised.

Here and There

246

In 1921 the Canadian Pacific paid out $2,000,000 from freight revenue in loss and damage claims. In 1927 it paid $700,000, a decrease to $1,300,000, although in the same period the gross freight revenue had increased by $15,000,000. Better freight handling did it.

The stonework and most of the partioning of the Royal York Hotel have been completed, and there appears every likelyhood that the great building will be open to the travelling public by June 1. This hotel is the largest and tallest in the British Empire.

Some idea of the world-wide area over which the Canadian Pacific operates may be gathered from the fact that in making out its monthly balance it is necessary to turn fifty-nine different foreign currencies into dollars in order to get an accurate result in Canadian money.

Wireless is now being used to aid in the protection of forests against fire. The Ontario Provincial Government planes are equipped with the latest apparatus with a radius of 400 miles, so that the headquarters may be readily communicated with and immediate steps taken upon the discovery of an outbreak.

"The principle of rapid freezing has such qualifications that there seems to be little room for doubt that it is going to revolutionize the fishing industry," stated W. A. Found, deputy minister of fisheries. "We intend to make thee xperimental station at Halifax of the utmost value to the whole industry."

W. J. C. Madden of Calgary, is making arrangements with the Canadian Pacific Express Company for the transportation of whitefish caught in Great Slave Lake from Edmonton to Chicago. It is intended that the distance from the fishing ground to rail head will be covered in winter by five-ton trucks operating upon the thick ice of the Slave and Athabasca Rivers, traversing country that would otherwise be difficult to cross.

A new and strange form of wildfowl is being imported into Alberta by the Calgary Fish and Game Association, which has arranged to secure 2,000 Mongolian and Chinese ring-necked pheasants. The birds are to be liberated this summer throughout the southern part of the province, where 1500 were placed last season as part of the Game Association's plan for re-stocking Alberta's game bird supply. With all these Oriental birds loose the ancient Yellow Peril seems more imminent.

Clipping as much as an hour and a half off her schedule east-bound, and half an hour westbound, the Trans Canada Limited, crack flyer of the Canadian Pacific Railway running between Montreal, Toronto, and Vancouver, will be further remarkable this summer by reason of a "solarium" car, containing baths and a special sun-room, that will be included in her luxurious equipment. The Mountaineer, another speedy summer train, running between Vancouver and Chicago will also have "solarium" cars, and run on faster time. The Trans Canada makes its first run on May 12, and The Mountaineer on June 15. The former train makes 143 trips during the summer season covering a distance equal to about Sixteen and a half times around the world.

FOLK FESTIVAL FOR GREAT WEST

Norse handicraft will be one feature of the festival. Left, Pearl Bai, famous Danish Baritone, who will render Viking Songs. Right, a colorful national costume which will be one of several hundred.

[s the folk song, dance and handicraft festival developing into a permanent feature of life in the Prairie Provinces of Western Canada? It would seem so. The remarkable success of last year's festival at the Royal Alexandra Hotel, Winnipeg, raised the hope that it would become an annual event, and the announcement of this year's festival to take place at Regina, March 20th to 23rd, has been generally welcomed as an indication of the establishing of the Festival in the artistic life of the prairies. Those who witnessed last year's festival will never forget it. National costumes formed a riot of color, and national dances a perfect swirl of studied and dashing movement, while the music, both vocal and instrumental, was of such a standard as to set a high mark for future festivals.

The programme already arranged for the Regina Festival will be thoroughly representative of the various races that make up Canada's West. Eighteen racial groups will contribute their national songs and dances, and handicrafts, and the display of many colored national costumes will form a series of brilliant pictures.

All four countries of the British Isles will participate and European races that comprise these new Canadians will include Hungarians, Czechs, Ukranians, Serbians, Roumanians, Swedes, Icelanders, Poles, Danes, Norwegians, Dutch, and Germans, while from older Canada there will be French-Canadians, and the Department of Indian Affairs is arranging an exhibit of the handicrafts of the Indians of the prairies.

The Festival will be held under the auspices of the Canadian Pacific Railway and the musical features have been organized in cooperation with the Conservatory of Music of Regina College. It has the support of the Government of Saskatchewan whose Premier, Hon. J. G. Gardiner, suggested that this year It be held in Regina. In this connection W. M. Graham, Indian Commissioner, Department of Indian Affairs, Saskatchewan, is arranging to provide an Indian section where women's work demonstrating native industry will be lent for the Festival from the Saskatchewan Government collection. Further, the Canadian Handicrafts Guild, through its Regina committee, is arranging a general exhibition of handicraft work, collected from all over Canada, but emphasizing the handicrafts of the people of the West.

Special guest artists from the east of Canada will include Poul Bai, Danish baritone, whose rendering of Viking songs at the recent Vancouver Sea Festival, will be remembered, and Charles Marchand, French-Canadian folk singer and leader of the Bytown Troubadours, an aggregation known all over Canada and the United States. The Regina College of Music will give English folk-dancing, while Miss Jean Gauld of Regina and her pupils will present the Scotch and Welsh varieties. Irish dances will be given by two Irish champions. In this way the British Isles will be covered. The Sarbian national dance the "Kola", will be rendered by twenty New Canadians of Regina, and a German mixed choir will sing under the leadership of J. W. Ehrlich, also of Regina. Men and women representative of the other racial groups will perform national folk dances and show handicraft work either in the finished state or in process of being made.

A great field of wonderful endeavour and the fruit of a score of different cultures will thus be paid before the people of the West during the Festival and the way Canada is being enriched by her New Canadian citizens from overseas will be demonstrated. Concerts in connection with the Festival will be given at the Hotel Saskatchewan and in the Darke Music Hall of the Regina College.

TO DEVELOP ALBERTA NORTH SALT DEPOSITS

A possibility that large financial interest may undertake development of the salt deposits at Fort McMurry, without loss to those who already have invested in that field, and without to Alberta government undertaking the expense of building a railroad around a difficult promontory to the old plant, was suggested by Premier Brownlee during a discussion of the estimates of the department of railways and telephones in the legislature on Tuesday evening.

SUCCESSFUL WOMEN'S CO-OPERATIVE PLAN

One of the most successf l co operative marketing organizations in the west is governed by four women and two men, and the president is Mrs. John Holmes, of Saskatchewan. The profitable pool, The Saskatchewan Egg and Poultry Producers, Limited, with a total membership of over 19,000, was organized by a number of farmers wives less than three years ago and is now doing a gross annual business of approximately $600,000. Last year the Pool arkld 18,000,000 eggs and over half a million pounds of dressed poultry, most of which went to eastern Canada and the United States.

Sir J. M. Aikins, former Lieutenant Governor of Manitoba, ded suddenly Wednesday morning.

DOES NOT APPROVE OF THE BRITISH HARVESTER PLAN

The provincial government does not believe in the policy of bringing in harvesters from the British Isles to work the short harvest season in this province, but the government is strongly in favor of the practice of bringing in boys for farm training and ultimate assimilation as Alberta citizens, Premier Brownlee stated Wednesday afternoon during a discussion on immigration.

CONFIDENCE LOST IN THE GRAIN COMMISSION

Reorganization of the present board of grain commissioners to produce a body that would function more efficiently, was asked in a resolution accepted by the Canadian Council of Agriculture. The resolution asked that th board consist of five members, one each from the four grain producing provinces, stated that the farmers had lost confidence in th present board of grain commissioners.

The annual budget statement has been presented in the Federal House. It announces a reduction in the net debt of Canada for the present fiscal year of $69,782,000; the estimated surplus of total revenues over total expenditures of 69,782,000; estimated total revenue for year of $454,942,000; a reduction in debt in six years of $226,708,000.

St Johns Choir Gives Good Entertainment

Was Held in Gordan Memorial Church Last Tuesday Evening

Although the attendance for the entertainment given in Gordon Memorial church last Tuesday evening by St. John's Church choir, of Medicine Hat, was not as large as was expected those present thoroughly enjoyed the varied program put on. The chouses by the choir were exceptionally well rendered, and showd not only that the leader, Mr. Bullen, is a very capable instructor, but that the choir possesses some very fine talent.

The solos, duets, trios quartettes, piano selections and readings were all greatly enjoyed. Among those who took part were Miss McWain, and Messrs. B. Thacker and Geo. Thomas.

After the program the Ladies' Aid served refreshments to the visitors during which they were complimented on all sides for the great success of their entertainment.

Canada Approves Treaty To Renunciate War

The House of Commons approved the general treaty for the renunciation of war, which was signed at Paris last summer. The Senate has also signified its approval of the pact.

The end of what was, at times, a somewhat stormy debate came quietly with a brief speech by Premier King the mover of the resolution for ratification of the treaty. At the conclusion of the Prime Minister's remarks the motion passed without any demand for a vote. Consequently there was no division.

The Prime Minister referred to the question of reservations which have called forth comment by a number of members during the course of the debate. Mr. King believed that, as the treaty now stands, the adherence of Great Britan to the treaty is given without any reservation.

We understand that U. F. A. Locals of this district are petitioning for the building of a Pool elvator at Bowell. In a list of proposed new elevators just issued by the Pool, we do not notice Bowell mentioned. Locals concerned should not give p trying to an elevator is badly needed in the district.

Churches.

ST. AMBROSE CHURCH

Rev. J. L. Cooper

Services as usual next Sunday.

GORDON MEMORIAL UNITED CHURCH

Rev. W. B. Smith, Pastor

Sunday March 3rd 1929

Church School at 10 a. m. This is the monthly missionary Sunday. A short program by senior C. G. I. T Envelope offering for the M. & M. fund.

Morning worship 11:15. Special monthly service for children.

Evening worship 7:30. Subject My Church.

Miss Mitchell, travelling secretar of the W. M. S., will address a meeting on Tuesday afternoon at 3:30 and then hlweek service will be held on Tuesday evening at 7:30 when Miss Mitchell will speak.

CHURCH OF THE BRETHREN

Rev. Mr. Mulligan, Minister

ST. MARY'S CHURCH UNIFIED FINANCE CAMPAIGN

Celebration of Mass. Second and Fourth Sundays of each month at 9:30 a. m.

Canadian Nationality Defined In House

Mr. Gershaw, M. P. Writes Review Giving The Details

The Review is in receipt of the following explanation of "Canadian Nationality," in a letter from Dr. Gershaw, member for this constituency in the Federal house:

On February 15th an interesting discussion took place in the House of Commons on the question of Canadian nationality and race. A Canadian National is defined as follows:

1. A British subject with Canadian domcile,

2. A person born in Canada who has not become become an alien.

3. A person naturalized in Canada.

4 The wife of such person.

5. A person born outside of Canada whose father was a Canadian National at the time of his birth.

The definition of race is not very clear. There are the broad distinctions of color, e. g. white, yellow, red, etc. The French have developed a distinct type but there is no American race, and in Canada with the many races that have been welcome here, no distinct type or race has developed. The essential word in the definition of a Canadian National is the word British, and as long as we are a Dominion within the Empire we are British subjects, Canadian citizens.

The Minister gave assurance that in future census forms, Canadians under the Act would be treated as Canadian citizens and that there would be a simplification of the number of questions asked.

To advance the scientific knowledge, the effect of th fusion of races and the characteristics that have marked people by reason of their origin and the intermingling of races is of great importance to the historian. For this purpose the original origin of Canadians is recorded in the census returns.

TEST SEED WHEAT

Testing of seed wheat is strongly recommended by the Alberta Wheat Pool. By seeding a couple of hunlred kernels of sample of seed to be used, in a flower pot or box, and keeping the soil moist, a good idea is obtained of what the seed will do when placed in the ground next spring. Clear, pure seed that will germinate evenly will increase the bulk and quality of the crop.

ADDITIONAL LOCALS

Veather has been very springlike for he past few days. March is surely coming in like a lamb.

Grain mixing formed the main topic of discussion at the session of directors of the prairie provinces Wheat Pool in Calgary this week. A resolution urging that outturn grading standard be considerably higher was passed unanimously.

No Doubt About this Famous Cereal

SHREDDED WHEAT

High value at low cost
Ideal for Winter with hot milk
Proved by 34 years of growing popularity

Made by The Canadian Shredded Wheat Company, Ltd.

The Noxious Weeds Menace

This is an age of conventions. They are a natural growth and outcome of the more complex and highly organized development of modern life. They are, too, a recognition of the fact that the principles and methods of co-operation are, in many ways and to a large extent, replacing the old individualistic ideas and efforts of the past. This is not to say that the value of individual responsibility and initiative has been, or is to be, discarded; rather, that in this age of rapid transportation and communication the old isolation has disappeared and peoples and nations are brought close together. They must, therefore, act as units rather than as distinct and separate entities.

This by way of introduction to a reference to a recent gathering held in Saskatchewan at the call of the Provincial Minister of Agriculture, namely, the first Saskatchewan Weed Conference. It was not a large and spectacular convention as many present-day conventions are, but in the importance of the problem it met to consider, it took second place to none. And while it was a Saskatchewan conference, its deliberations and findings were of equal value to the other prairie provinces.

The conference was summoned in recognition of the fact that weeds are making tremendous headway in Western Canada, and that some action must be taken, over and above the preventive policies of the past, if the inroads of weeds and the consequent enormous loss to the farmers and the country as a whole is to be checked.

The conference was attended not only by officials of the Saskatchewan Government, municipalities and farmers' organizations, but by Dominion Government officials, representatives of the railways, mortgage and loan companies, manufacturers, business men, merchants—in a word, every organization having a vital interest in the productive capacity and prosperity of Western Canada.

It was frankly and unanimously agreed that the whole country must be aroused and organized in a campaign for the destruction and elimination of weeds. The only alternative is a rapidly decreasing agricultural production both in quantity and quality, smaller returns to the farmer, and decreased business and prosperity for all.

The duty and responsibility of the individual farmer in the matter of keeping his own land free of weeds was in no sense minimized, but it was recognized that, human nature being what it is, some men will neglect their duty, and while they themselves suffer as a result of such neglect, they also inflict loss upon their neighbors who are doing their duty, and upon the community and country as a whole.

The need, therefore, for concerted Government and municipal action was emphasized, and the absolute necessity, in the interest of all, for more drastic control recognized.

It was realized that not only must existing weeds be brought under control and eradicated, but that much more efficient measures must be taken and greater precautions observed to put a stop to the sowing of weed seeds and the propagation of the weed plants.

It is not possible in this article to discuss all the phases of this intricate problem, but at this season of the year, when farmers are beginning to think about and plan their work for the spring, one factor may well be stressed. That is, the importance of sowing good, clean seed and not a mixture of grain, good and bad, and weed seeds.

The astounding discovery was made by the seed drill survey conducted in Saskatchewan that 70 per cent. of the seed sown in the province was lower than No. 2, due largely to the inefficient operation of farm fanning mills. In other words, while farmers and governmental authorities on the one hand are fighting weeds, the farmers in the sowing of their crops are planting thousands of bushels of weed seeds.

The first step towards victory over the weed enemy is to put an immediate and definite stop to the planting of weed seeds in prepared soil. If the propagation of weeds is continually carried on and assisted in this way, it must be recognized that the weed menace will grow, and that final victory will rest with it and not with the farmer.

The spring slogan for all Western farmers in 1929 should be: Look to your seed grain. See to it, above everything else, that it is good, clean seed. If weed seeds are sown, it is inevitable that weeds will be harvested. Remember, it is still everlastingly true in farming as in all the activities of life that, whatsoever a man soweth that shall he also reap.

Silver Foxes for Italy

A number of silver foxes have been sent from Canada to ranches in the Italian Alps, where ranching conditions are stated to be ideal, and where the fox farming industry is showing a steady growth.

When the plumber died his wife took no chances. She buried his tools with him.

During the World war a person's equilibrium was tested for flying by an elaborate turning chair.

Needs Some Exercise

The idle farm horse is better to rough it a little. Heavy feeding is unnecessary, and standing day after day in a warm stable unfits the horse for spring work. A few hours in the yard or field every day keeps the muscles hard.

Use Minard's Liniment for the Flu.

He—I suppose I'm only a pebble on the beach of your life?

She—That is true, but you might stand a chance if you were a little boulder.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to garble the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Lieutenant-Governor Appointed

J. D. McGregor, Brandon, to Succeed Late Hon. T. A. Burrows

J. D. McGregor, Brandon, has been appointed lieutenant-governor of the province of Manitoba. Mr. McGregor succeeds the late Hon. T. A. Burrows who died in Winnipeg recently. Announcement of the appointment was made by Premier W. L. Mackenzie King at the conclusion of a meeting of the cabinet.

The lieutenant-governorship was offered Mr. McGregor several days ago, and from his home in Brandon, he announced acceptance of the post, stating that he considered the appointment as a compliment to the agricultural interests of the province rather than to himself personally.

WAS ALWAYS AILING NEVER FELT WELL

Health Restored Through the Use of Dr. Williams' Pink Pills

"I am one of the many who have found new health through the use of Dr. Williams' Pink Pills," says Mrs. Everitt Dowe, South Nelson, N.B. "For some years I never felt well, and at times was so weak that I would be confined to bed. At the very best I was in an ailing condition and found it difficult at all times to do my housework. I was subject to headaches, poor appetite, breathless at the least exertion, and very pale. Before Dr. Williams' Pink Pills were recommended to me I had tried several medicines, but without any good results. I had become completely discouraged and felt that I would always be an invalid. A friend strongly urged me to take Dr. Williams' Pink Pills, and finally I consented to do so, but without much hope that they would help, where other medicines had failed. But in this, to my joy, I was mistaken. I had not been taking the pills very long when I knew they were helping me. As I continued their use I found my appetite improving, I slept better at night, and my strength was gradually returning. I continued taking the pills for several months, when I again found myself a well woman, and I believe that had it not been for Dr. Williams' Pink Pills I would to-day be a helpless invalid. The pills have since been taken by others in our family with the same beneficial results. I strongly urge every weak woman to try this grand health-building medicine."

If you will send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., a little book, "Building Up the Blood," will be mailed you postpaid.

You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Advances New Theory

Baltimore Physician Says Lack of Lime Makes People Irritable

More lime in the diet as a preventive for divorce was urged by Dr. George Walker, addressing the National Housewives, Inc., at Baltimore. Absence of lime, he declared, makes a woman nervous and a man cruel—hence family troubles result.

When there is every appearance of a home being wrecked Doctor Walker suggested that lime, as found in a pint of milk, added to the diet of a couple daily for two weeks in all probability would adjust matters, restore amicability and keep the home intact.

He also would add two oranges a day for each and a quarter pound of cold slaw at least three times a week.

It Rids Pain Begone.—When heuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Eclectric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

As a molecule of water passes through the pores of your skin it is like a man passing through a gate seven miles wide.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

New Air Service Planned

Air express and passenger service between Winnipeg and United States points will be established within a month on a tri-weekly basis, according to Capt. F. T. McCarty, president and operating manager of the International Airways, Inc., of Seattle. The service will be in co-operation with the Western Canada Airways, Limited.

How many people with an automobile today owned a horse and buggy in the days of not so long ago?

Minard's Liniment for the Grippe and Flu.

W. N. U. 1771

Hydro Power Shows Record Development

Dominion Now Has Total of 5,328,000 Horse-Power

With world interest centered upon the efforts being put forth in almost every country to secure additional supplies of low-priced power for the needs of industry, the recent official review of hydro-electric progress in Canada is of particular interest, indicating, as it does, that throughout the Dominion the greatest activity prevails in harnessing for industrial, commercial and domestic use the advantageously situated and ample water-power resources of the country.

During the year 1928 the energy of the water-wheels or turbines actually installed and brought into operation amounted to 550,000 horsepower, thus bringing the total for the whole Dominion to 5,328,000 horse-power. In addition to this increase there are many projects under active construction, some of them nearing completion and others just recently initiated, whose combined installations will result in adding more than 1,200,000 horse-power to the country's total. There are also many projects of magnitude in the formative stage, some of which will undoubtedly be undertaken in the near future.

For the actual development, transmission, and distribution of the power capacity installed in 1928, together with that now under active construction, it is estimated that not less than $330,000,000 will be required; while for every dollar expended in power development competent authorities have estimated that six dollars are required in its application. It is necessary, therefore, to visualize the effects throughout the country of the expenditure of an amount reaching, probably, $2,000,000,000.

New Oriental Silk

Japan and China Have Invented Mixed Fibre Product

To combat American artificial silk manufacture, Japanese and Chinese manufacturers have invented a new silk fabric, utilizing both real silk fibre and those of spruce wood in a combination, the sheen of which is expected to revolutionize the present market, according to a Yokohama exporting firm.

Artificial silk has seriously affected the production of cocoon skeins in the Orient during the last two years. The new cloth is expected to reach world markets in the early spring.

For Scalds or Burns.—Dr. Thomas' Eclectric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and adds a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. With this in the house and stable saves many a doctor's and veterinary's fee.

A Peculiar Timepiece

Clock Made in Switzerland Looks Like Sun-Dial

A turtle tells you the time in a unique timepiece produced in Switzerland. At first glance, the clock appears to be a sun-dial with a circular tray, filled with water, set in the face. In this tray a small imitation turtle floats, carrying a piece of steel in its beak. As the hour hand advances under the tray it attracts the turtle by means of magnet. If removed from the water and later replaced, the little turtle immediately swims across to the point on the tray directly above the hand, thus indicating the time. The eight-day clock mechanism is wound in the usual way, and regulated after the tray and the face of the timepiece are removed.

Weapon Appears Harmless

Pistol Found in New York Looks Like Fountain Pen

A "fountain pen" that spurts 38-calibre bullets was picked up near a street corner in New York City recently and turned over to the police. The weapon, little longer than the width of a man's hand, is shaped to appear merely a harmless writing instrument. A few feet away, it would be mistaken for a real pen. Only when it is examined closely does the open muzzle at one end reveal its dangerous character. The pistol unscrews in the middle to insert the cartridge. It is fired by pressing a small button, about the size of a pinhead, in the end of the weapon. This releases a spring that operates the firing pin.

The Adirondacks contain more than 100 scenic lakes.

Cuticura Soothes Burning Aching Feet

Bathe the feet for several minutes with Cuticura Soap and warm water, then follow with a light application of Cuticura Ointment, gently rubbed in. For tired, hot, irritated feet this treatment is most comforting. Cuticura Talcum is cooling and refreshing.

Sample Each Free by Mail. Address: Canadian Depot: "Dept.X, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c., Talcum 25c.

Cuticura Shaving Stick 25c.

Three Hundred Years To Prepare Grammar

Immortals of French Academy Still Working on Book

"The world of letters moves slowly. Witness the speed in action of the "immortals" of the French academy; 293 years ago the body, the personnel of which remains numerically fixed at 40, although its component individuals change with deaths and new elections, announced that it was going to publish a grammar of the French language.

Now the permanent secretary of the academy promises that the book will actually go to the printer soon —probably in 1930.

At the time of its foundation in 1635, the French academy was pledged to undertake publication of three works. Ten years later it was announced that one of these, the long awaited grammar, was "being prepared." The "immortals," to whom two or three centuries are of slight import, have been preparing it, ever since.

Protect Your Children From "Flu," Grippe

A WARNING TO PARENTS!

Flu germs are everywhere today. They reach the system through the nose and throat. Mothers can protect their children in a very simple way.

Take a saucepan of water, place it on a lamp or stove. Add a half teaspoonful of Catarrhozone to a pint of water, which is brought to a boil. Let the steam from the kettle fill the room so that the medicated air is breathed by the child. This germ-killing vapor disinfects the child's breathing organs and kills the "Flu" germs.

Catarrhozone Vapor stops cold, prevents Grippe, relieves Sore Throat, prevents Flu. Safe and efficient. Just as good for adults as for children. If you keep the air in your home disinfected with Catarrhozone Vapor you are well protected from dangerous Flu, Influenza, Grippe, and Colds. All druggists sell Catarrhozone in 50c bottles.

More Purchasing Power

The purchasing power of the people of Canada increased by half a billion dollars during 1928, when revenue from productive industries reached the record total of $6,840,-273,995, an increase over 1927 of almost $500,000,000.

Shipping Sets New Mark

New Westminster Exceeds 1927 Record by Forty-five Ships

A new mark in shipping was set at New Westminster during 1928, exceeding by 45 ships the 1927 record of 153. The figure does not include the coastwise shipping, which is handled through the Department of National Revenue. The net tonnage of the ships handled through the harbor commissioners' office was 625,371 tons and the gross 984,368 tons, compared with 483,603 and 776,229, respectively, in 1927.

Exhausted from Asthma.—Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

Built To Auto Design

First British 'Plane of This Type Put on Market

Britain's first airplane to be built to automobile design has been placed on the market under the name of Simmonds Spartan light plane.

The craft has four wings, which are interchangeable in the same way that the four wheels of an automobile are interchangeable. There also is a spare wing which is carried for emergencies.

The new machine is fitted with a four-cylinder, air-cooled engine of 80-85 horse-power. It recently was tested on a non-stop flight from London to Berlin, 620 miles, in six hours.

Statue for Mrs. Pankhurst

Premier Stanley Baldwin has consented to unveil a seven-foot bronze statute of the one-time suffragette, Mrs. Emmeline Pankhurst, to be erected in Westminster this summer from publicly subscribed funds.

New Brunswick's contribution to Uncle Sam's Yuletide celebration included some 3,000,000 Christmas trees—the greatest number ever shipped from the province.

Minard's Liniment prevents Flu.

Politness is one of the best investments known. It pays enormous dividends.

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to ensure the public against imitation, the Tablets will be stamped with their "Bayer Cross" trademark.

The Short Line To Europe

Hudson Bay Route to Liverpool Means Great Saving

Far north in Canada a new railroad is taking form rapidly, and within a year the Hudson Bay Railway will be in operation from The Pas, Manitoba, to Fort Churchill, on Hudson Bay. The Pas is nearly 500 miles from Winnipeg by rail, and the extension to the west shore of Hudson Bay is nearly as much farther.

Through the Hudson Bay and eastward through Hudson Strait, skirting Labrador and passing south of Greenland, lies the short water route to Liverpool, a distance from Fort Churchill of approximately 2,000 miles. Following in a general way the 60th parallel of latitude east, the route is shorter even than the distance between Atlantic coast cities and Liverpool, and grainboats receiving the products of the farms of western Canada after a relatively short rail haul will have a shorter trip than those operating from Montreal, New York, Baltimore and the other important points of transshipment.

As a result of observations from vessels and airplanes, engineers incline to the belief that the Hudson Strait is blocked by ice less than eight months in the year and that in the early fall, when the grain begins to move, ships may operate safely from the railhead at Fort Churchill through the northern passage—a route which all the early explorers believed existed and which many sought unsuccessfully—to Europe, eliminating many hundreds of miles of rail, lake and rail movement of the grain.

As the Hudson Bay Railway takes shape, the advocates of a line through the Peace River country, 1,000 miles to the westward, take hope in the prospect of a new line reaching across an even more northerly section of the Dominion than the Canadian Nationals' present line, connecting on one end with the Hudson Bay route and on the other with the Peace River country, and thence to the Pacific through a connection with the present Prince Rupert line. Adequate transportation will open up more of Canada's enormous wealth.

Anxious To File Homestead

Man Held First Place in Line During Bitter Weather

Walking or running back and forth the width of the land office at Peace River in order to fight the bitter cold of 45 below, and relieved by his partner, a prospective homesteader for several days and nights kept his position secure as first in line for his choice of land which was thrown open for entry at the end of January. The days became steadily colder after he took up his position. Courage and fortitude to get a home were suffered uncomplainingly but for all taut a terrible price to pay for a homestead.

Advice to Dairymen

W. T. Hunter, superintendent of the Dominion Experimental Farm at Summerland, is urging the dairymen to procure the best high grade dairy stock, because prices are about to make a big advance, he says, and the Okanagan Valley is one part of Canada where butter-fat can be produced very cheaply.

Wife—"Don't you think I have put too much salt in the soup, dear?"

Model Husband—"Not at all, darling, there is, perhaps, a little too little soup for the salt, that is all."

Broad leaf wood is carbonized for acetic acid and wood naphta and coniferous wood for turpentine, oil and tar.

You can't play truant in the school of experience!

"Yes, Miss Rosa, it is a fact that the son of a genius is nearly always a fool."

"Was your father a genius?"—Der Brummer, Berlin.

The Red Cross Rendezvous

Valued Service Rendered by Society at Alberta U. F. A. Convention

January sees the yearly pilgrimage of the hundreds of Albertan farmers to the great four-day powwow in the capital city of Edmonton, the big event of the year known as the U.F.A. convention. Twelve hundred people trekked into the city that week, consisting of delegates, their friends and hundreds of interested visitors. Six extra C.P.R. cars of sleepers ran between the two cities, Calgary and Edmonton, for the trek from the south required the comfort of these modern "covered wagons," where a man can put himself and wife and family to bed in snowy blankets and enjoy warmth and good food and an electric light by which to read his paper.

For the pilgrims were not men alone—although the majority represented the sterner sex. With them were the womenfolk, westerners all, registering in their eyes a hint of wide horizons in far flung prairies—or the silence that is found in solitary places—looking as women look who seek for things afar off, and have an inexhaustible faith, an unquenchable hope, and a charity that bereth all things.

Some little ones, too, were seen in the gathering, bundled up morsels of humanity as they trundled out of autos and trains.

This explains the specialized service of the Alberta division of the Red Cross which made the strenuous days pleasant and easy.

Right at the top of the great red brick church, far removed from the busy platforms where a lieutenant-governor and a premier and many mighty men of valour declaimed daily before the microphone, might be found the eyrie of the fledglings—the children's nursery and Red Cross rest room.

A haven of refuge this, with snowy cots for tired little feet, too tired to toddle any more, roomy rockers where many a mother reclined when the heat of the argument downstairs and the steam-heated atmosphere drove her to take a siesta with the children. A Peter Pan playroom for the four-year-olds and a tiny tea table with real tea things at which presided Miss Seven-Past at the Mad Hatters' tea party completed a charming toutensemble.

Such was the much valued service rendered by Red Cross at the annual United Farmers of Alberta convention, when hundreds of farm men and women touched city life in close contact in an adventure of education, and entertainment.

"Meet me at the Red Cross" became the call of busy fathers and mothers who wended their several ways to lecture halls or committee rooms. Safely parked for hours, the children were shepherded under the well known flag bedecking the walls of that upper room with its peace-time message "Still serving."

Said one anxious looking individual with his arms full of mother's shopping plus an obstreperous infant, "Red Cross still serving! Thank goodness for that."

Cannot Be Standardized

Efficiency in Every Line Confined to the Few

"It very often follows that the man who keeps scrub stock is a scrub farmer." That sentence in a discussion of livestock breeding catches the eye of the editor of the Chicago Drovers' Journal, who remarks that it is not a new thought, and that we all know there is much truth in it. The only value he observes in it is that it may stir some fellow, whose stock looks pretty hard to try to do better. Some folks say there is no place for scrub stock, and can't understand why any of it is produced in a civilized country. But we never will be rid of it. There will always be scrub stock, and scrub farmers, and scrub doctors and lawyers and, yes, even newspaper men! Efficiency never can be standardized. Always some will do better than others.

Gold in Alaska

Alaska can still point to its mountains and say that is gold in them thar hills. In 1926 its miners extracted $6,776,000 worth as against $5,927,000 for 1927. Prospecting still goes on, but no new find of considerable moment was reported last year. Every year sees a few placer mining fields worked out, but Alaska never troubles itself about that, always feeling sure new ones will be discovered. Experience has given fair warrant for the optimism.

Registered in error as "Alice" instead of "Ellis," 43 years ago, a Leeds, England, business man has just discovered that officially he is a "woman."

Studying Interior Of Earth

Much Will Be Learned in Future Is Belief

Not even the most visionary of natural scientists would venture to forecast that a system of antipodal tunnels would be a part of the transportation scheme of the future, nor that greater knowledge of the middle of the earth will be gained by burrowing a few thousand miles into it. But that a great deal more than is now known is going to be learned of the innermost interior of this great planet of approximately 8,000 miles in diameter is unquestionable.

Prof. Reginald A. Daly of Harvard university says that "the 19th century bequeathed to the 20th an outstanding responsibility—to invent and to use new methods of exploring the earth far beyond the reach of direct penetration by the geologists' eye or by mine and bore-hole."

That important progress will be made in this direction Professor Daily expresses a strong belief. The inner earth, he says, "is a gripping subject of research," and through the study of "rays" and "waves" he believes much will be accomplished toward determining the exact character of the earth's center.

West Indies Seek Aid From Canada

Want Obstacles to Sale of Products in Dominion Overcome

A suggestion that Canada be asked to establish an organization similar to the Empire marketing board or contribute funds to the Empire market board to enable the West Indies and British Guinea to overcome obstacles to sale of their products in the Dominion was discussed before the first West Indies conference.

Speakers pointed out that new steamship services between Canada and the West Indies must increase trade between the Dominion and the colonies, necessitating action to facilitate the exchange of goods.

Advance in Aviation

There are 55 commercial aviation companies in Canada, according to a report of the Department of National Defence. This is more than twice the number in operation a year ago. There are also 15 private owners and 16 flying clubs. One concern carried 9,647 passengers and 1,192,000 pounds of freight during 1928.

Special Tax for Bachelor

Bachelors more than 30 hereafter must pay the Nish district government in Jugo-Slavia a special tax for their lives of single blessedness. All adult citizens who are not members of some cultural, educational, charitable or patriotic association must pay an even higher penalty.

Seed Grading Growing in Favor

Minister of Agriculture Gives Report for Past Fiscal Year

The grading of farm and garden seeds is a very important service of the Department of Agriculture at Ottawa. The principle upon which the Seeds Act is based is that of established grade names with provision for grade definitions that are prescribed by regulations. Provision is made within the act for the compulsory grading of nearly all kinds of seeds, and while field roots and garden seeds may be sold under a guarantee of minimum quality yet the grading of these seeds is steadily growing in favor, according to the Hon. Dr. W. R. Motherwell, minister of agriculture, in his report of his department for the past fiscal year. The grading is done on a basis of controlled samples received at the central office of the seed branch at Ottawa and district offices at different points in the country.

As indicative of the volume of work and responsible duties involved in grading agricultural seeds and in checking seed importations, the Hon. Dr. Motherwell points out that there were 5,308 samples recorded, tested and graded during the year under review. The total amount of seed represented by these samples was, of course, very large, amounting to millions of bushels.

A Word Of Praise

Many Workers Would Rather Have It Than Extra Money

Is there anything so easy to give as a word of praise where it is deserved? Often those who have gone to much extra trouble in doing something special receive no recognition at all. Perhaps they are paid with money. But it is safe to say that many workers would rather have a word of praise from their employers than extra money. Praise not only gives the employee confidence in himself, but acts as a stimulant in his work which he attacks with greater energy than before. A word of praise brings happiness to those who have tried to do their best. Praise is cheap but valued greatly. Be quick to praise.

Sure to Return

Here is the latest story about a plumber.

He was just starting off to work when his wife said:

"Bob, bring me in some butter when you come back for whatever you're leaving behind.

"Iceland," said the teacher, "is about as large as Siam."

"Iceland," wrote Willie afterwards, "is about as large as teacher."

Traffic Jams In Air

Private Airplanes Throng Route From Paris to London

Traffic jams have followed the airplane into the air. The Le Bourget-Croydon air route, despite the immensity of the heavens, suffers from overcrowding just like the narrow streets of cities.

French and English governments are trying to agree on a means of policing this great skyway. The chief cause of trouble has been privately owned airplanes whose pilots for greater safety and commodity preferred to follow the regular route of the big commercial air lines.

These planes have increased in numbers to a point where they are a menace to traffic, especially in hazy weather. When visibility is low, the big London-Paris planes have many narrow escapes from collision.

Some Peculiar Plants

Oriental Countries Have Few With Odd Characteristics

The Egyptian lotus has some peculiar characteristics. For example when growing it can be cut and fed to cattle, yet when ripe it contains a deadly poison.

Then take the Indian plant of which the native name is Madar. The leaf, treated and applied like a poultice will cure a severe sprain or bruise, yet the milky juice has an extraordinary effect if swallowed. The sufferer has fits of terrible dejection alternating with bursts of wild merriment and shrieking laughter. This goes on for some hours; then, if the dose has not been severe enough to cause death, the patient falls into a deep sleep from which he wakes up comparatively well.

All Lives Are Interesting

An Article in E. W. Howe's Monthly Says

"If a man is fairly intelligent, he has had experience of interest; if disposed to frankness, his autobiography would be of value. Every man can place colors on the life picture a little differently. I find much more interest in a good autobiography than in any story of polar exploration. There is nothing at the North Pole that concerns any of us; nothing in life that does not."

Alberta Will Adopt Pensions

The province of Alberta will shortly adopt the old-age pensions scheme. This was stated by Hon. Peter Heenan, minister of labor, to a delegation representing the railway brotherhoods which waited upon members of the Dominion cabinet.

Continuity in advertising is as necessary as continuity in breathing.

Revise Map Of Antarctic

Great Change Will Likely Be Result of Explorations

Sir Herbert Wilkins has been compelled to suspend his exploration program in the Antarctic continent for the present season because of the exceptionally warm summer conditions he has encountered. Because of his inability to locate a new base nearer the Pole, and the soft state of the snow, his projected flight from Deception Island across the continent has been frustrated and must be postponed until a more favorable opportunity. This would have formed a dramatic and spectacular climax to his expedition, but its abandonment does not mean that his venture has failed in its main purpose. For the discoveries already made are of far greater significance as contributions to the world's stock of knowledge regarding the South Polar regions and radically change the prevailing conception of its geography.

The arm of Antarctica that reaches up in the direction of Cape Horn will no longer appear on the revised maps as a continuous projection of the mainland. In reality it is an archipelago of islands. Graham Land, also believed to be an extension of the mainland, has been found to consist of two great islands, the more southerly of them being separated from the continental area by a strait ranging from 40 to 50 miles wide. Just where the border of the true mainland actually lies is still undetermined, but progress of remarkable interest to geographers has been made towards its final location.

Apart from this scientific interest, the identification of these lands as islands has the practical value of permitting the establishment of bases for future airplane exploration at points farther south than had been previously believed possible. Still more important is the possibility that it may open the way to the location of meteorological stations where observations can be continuously recorded for the purpose of long range forecasting. This is a new element in Antarctic exploration that has not hitherto been taken into account. But Sir Herbert surmises that such meteorological data may disclose a close relationship between cycles of climatic change, originating in the ice-covered plateau of Antarctia, and the great droughts that periodically afflict Australia and other lands south of the Equator.

Discussing these and other possible results of the Wilkins expedition, Ivy Ireland Cowman, director of the American Geographical Society, declares that his work, together with that which Commander Byrd hopes to do, will result in a complete revision of the map of the globe. The exploration of a land of continental proportions seems an anachronism in the 20th century. Certainly this is the last generation which can indulge in such an experience.

Sodium Sulphate Deposits

The investigation of the natural sodium sulphate deposits in western Canada by the Department of Mines, has proved up tonnage of hydrous sodium and magnesium sulphate in excess of 100,000,000 tons. There are many other deposits in the prairie provinces which could produce sodium sulphate, but while the markets are limited and the price low, only those close to railways can be considered as producers at present.

Reward Wheat Distributed

Two hundred bushels of the "Reward" wheat are being distributed among 100 settlement board settlers in the southern half of Alberta. Each settler is limited to two bushels of this wheat for which a charge of $3 per bushel will be made. Very satisfactory results have been secured from the quantity of Garnet wheat which was distributed similarly three years ago.

The man who possesses a million is a capital fellow.

"What did your brother die of?" "A judge in a black cap."—Der Humor, Madrid.

AIRMEN RESCUE TRAPPER

Flying in the face of a northern blizzard two gallant fliers effected the rescue of a lone trapper, found lying in the bush by an Indian, on the shore of Lake Matagami, northern Quebec, his foot frozen and his life in danger by the 50 degrees of cold. Pictures show the two airmen (1) Pilot Clark, who led the rescue; (2) a Fairchild cabine plane which was used; (3) the town of Amos, where the plane landed to place the trapper on board train, and (4) two General Airways planes on the lake shore.

VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

Scott's Emulsion

abundantly rich in vitamins is of great importance in all run-down conditions of the body. Scott's Emulsion builds strength.

Scott & Bowne, Toronto, Ont. 23-61

WORLD HAPPENINGS BRIEFLY TOLD

The freighter Port Curtis arrived recently at Halifax from Auckland with more than 5,000,000 pounds of New Zealand butter, a record cargo.

The Rockefeller foundation has donated $85,000 to McGill university for medical research to be paid over four years.

Acting on the recommendation of the foreign minister, King Alexander of Jugo-Slavia has signed the Briand-Kellogg pact for renunciation of war.

Arthur F. Wallis, registrar of the surrogate court since 1911, and former editor-in-chief of the Toronto Mail and Empire, is dead at his home here. He was 70 years of age.

A treaty between the United States and Japan to aid in the prevention of smuggling of alcoholic beverages into the United States has been ratified by the senate.

It is understood the salary of Sir Hasil Blackett, newly appointed chairman of the merger company controlling Imperial wireless and cable communication will be $40,000 a year.

The menace of revolvers and threats of personal violence held no fear for Joseph Davis, clothing merchant of Ottawa, who successfully staved off an attempt by three would-be bandits to hold him up.

A reunion of an unusual kind was held in London when 34 Antarctic explorers, survivors in Britain of nine Antarctic expeditions and two relief expeditions, met to form a dinner club. Membership is to be limited to those who have participated in Antarctic explorations.

Leon Trotzky, whose opposition to the policies of the Soviet's leaders in Moscow caused his expulsion from the Communist party and his exile in Turkestan, was en route to Constantinople, it was revealed in authoritative advices received at London.

Minard's Liniment for Coughs and Colds.

Should Procure Oat Seed

Farmers of Alberta are being advised by the Provincial Department of Agriculture to make the necessary provision for securing the supply of oats for seed which they will require for their 1929 crop. The effects of frost in a number of districts are reflected in a reduction in the germinating quality of a great many of the oats threshed.

Discovers New Island

Commander R. E. Byrd in a flight over King Edward VII Land discovered a new island and 14 peaks according to a radio message from the Byrd South Pole expedition copyrighted by the New York Times and the St. Louis Post Despatch.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

It is not doing the thing we like to do, but liking the thing we have to do that makes life blessed.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Ottawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so.

"A friend advised me to take

MILBURN'S HEART AND NERVE PILLS

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Safety Device For Miners

Copper Diggers in Mexico Wear Steel Head Protection

A United States bureau of mines engineer reports, following a recent visit to one of the big Mexican copper diggings, that the latter concern permitted no one, miner, manager or visitor, to go underground unless he wore a steel head protection. The company furnishes the helmets to the men at 50 cents each and replaces all damaged ones free of cost. On one occasion a chunk of ore weighing 87 pounds fell through the top tagging, a distance of four feet and struck a miner squarely on top of the head. The steel hat was badly dented, but the man was uninjured, save for a slightly sprained neck. The company has on exhibition at the mine head a collection of several hats, all badly dented, that represent each a miner's life saved.

Sale For Worthless Horses

Montana Packing Plant Will Require Seventy Head Daily

Surplus range ponies which now are more or less worthless, may find a market at the horse meat packing plant just opened in Grand Falls, Montana. Southern Alberta has hundreds of nondescript range horses roaming the prairies, eating up valuable grass and the Great Falls plant may be in a position soon to handle many of these animals for it will require 70 head daily. The output will be shipped to Continental Europe where horse meat is a staple commodity.

Mendicancy De Luxe

Young Englishman Simulating Palsy Collected Large Sum Daily

In the opinion of G. K. Chesterton, complete social equality in England will not be achieved until a costermonger may wear a sobriquet without exciting remark. It would be interesting to have his comment on the discovery by the police of a professional beggar with a valet. A young man, only 23, he was busily engaged in putting Mr. Ford's doctrine into practice and spending his easy earnings in ways which he thought to his own advantage when the authorities evinced an acute curiosity concerning the source and extent of his finances. A country house, with completely equipped billiard room, is another of his luxuries. His income, produced by simulating palsy, has amounted to as much as $100 in a day. Subway travelers, observing his pathetic figure, have been deeply touched—for sums from 10 cents upward. The interruption of this enterprising mendicant's activities, just at the threshold of the prosperous holiday season, must have been especially bitter.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Live Stock Prize Winners

Saskatchewan Breeders Won 160 At Fairs During Last Year

According to a compilation of the Live Stock Review of the Provincial Government Department of Agriculture, live stock breeders of the Province of Saskatchewan won 160 prizes in 1928 at the following fairs: The Royal Winter Fair at Toronto, the International at Chicago, and the annual fairs at Ottawa and Calgary. There were 8 grand championships, 6 trophies, 2 reserve grand championships, 10 senior and junior, 7 reserve senior and junior, 2 Canadian bred and reserve Canadian bred, 26 firsts, 27 seconds, 33 thirds and 34 others. At the Royal, 102 prizes were taken, 24 at the International, 26 at Ottawa and 8 at Guelph.

New Brunswick Settlers

Five Hundred British Families to Be Placed in Province

One hundred British families were placed on farms in New Brunswick in 1928 under the assisted settlement plan which completes the quota for that year. The scheme is being continued until 500 families have been located in this province. The farms are provided by the New Brunswick government. Loans up to £300 are made by the British government and the settlement arrangements are under the supervision of the provincial government. Repayments extend over 28 years with interest at 5 per cent. per annum.

LONG SLEEP MAKES BABY HAPPY AGAIN

"Our baby kept waking us several times a night, until we started giving him a little Castoria after his last nursing," says an Iowa mother. "He slept soundly from the first night and it made him look and feel worlds better." Baby specialists endorse Fletcher's Castoria; and millions of mothers know how this purely-vegetable, harmless preparation helps babies and children with colic, constipation, colds, diarrhea, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid imitations.

Vancouver Port Improvements

The Vancouver Harbord Board is understood to be seeking federal permission for launching a construction program involving $5,000,000 of port improvement. The proposed works include a deep sea pier, the first unit of a cold storage plant, a coastwise pier and extensive additions to the present grain storage capacity of the port.

FLU

Claims Many Victims in Canada and should be guarded against

Minard's Liniment

Is a Great Preventative, bring one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma and similar diseases. It is an Enemy to Germs. Thousands of bottles being used every day. For sale by all druggists and general dealers.

Minard's Liniment Co., Ltd., Yarmouth, N.S.

CHILBLAINS

Zam-Buk soon allays the fiery sensation of smarting, stills the rasping pain, and soothes its maddening irritation. Where skin is broken, Zam-Buk's aid is invaluable because of its great healing and antiseptic power.

Searching For Sunken Island

California Man Starts Fantastic Cruise Because of Dream

A "dream island," sunk by the Pacific ocean off the California coast, is the destination of a fantastic cruise headed by B. M. Bramley, paving contractor, who has bought the steam yacht Peary from Donald B. MacMillan, explorer, for the expedition.

Bramley's Island Bess under 20 feet of water, where it was first revealed to him in a dream while in Cleveland. So vivid was his dream and so inviting was the prospect of 20th century exploration and discovery in seas sailed for centuries by ships of every nation that Bramley set out in search of his island while in California.

A ship was chartered and he made soundings for days without success. He gave up the idea and was about to return when persistent prompting to find his "dream island" caused him to charter an aeroplane for further search. He found it, plainly visible from the cockpit, he said, in 15 or 20 feet of water.

Now he means to build a breakwater about the place, pump sand from the bottom of the sea to make new land, and erect thereon a fishing and outing paradise.

How Best to Use Vicks VapoRub After the Flu

Late Winter Colds Are Doubly Dangerous This Year; Don't Let Them Get a Start

AVOID PNEUMONIA OR A SECOND ATTACK OF FLU

If you catch a fresh cold, don't keep it overnight. If possible, go home and go to bed. Take a laxative and a hot lemonade, apply hot wet towels over throat and chest until the skin is thoroughly reddened. Then rub vigorously with Vicks. Spread on thickly and cover with warm flannel.

Leave the bed-covering loose, so that the vapors, released by the body-warmth, may be freely inhaled. All the while, time, Vicks acts through the skin like a poultice.

Repeat this treatment every four hours at night, and stay in bed until the cold is broken. Complete rest helps the body throw off the cold more quickly.

Mothers especially appreciate Vicks for the children. As it is applied externally, it can be used freely and often, without upsetting delicate digestions, as too much "dosing" is so apt to do.

Skipping Motor Age

China Is Now Turning Her Attention to Aviation

China, if the signs are read aright, is about to "jump" the automobile age and pass direct from the bullock cart and railroad to the aeroplane and all that it embraces. This is not to say that motor car manufacturers may not find a lucrative field in the 18 provinces which comprise China proper, for the automobile is making inroads there; but it is almost certain that before the motor vehicle has become to the east what it has become to the west, aviation will have found acceptance as a common means of conveyance.

Milber's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the unhappy and painful surfaces to healthfulness. They are an excellent remedy for these evils.

An Eastern Saying

He who knows not, and knows not that he knows not, he is a fool—shun him;

He who knows not, and knows that he knows not, he is ignorant—teach him;

He who knows, and knows not that he knows, he is asleep—awake him;

He who knows, and knows that he knows, he is wise—follow him.

The longest telephone call in the British empire is now from London to Vancouver, a distance of 7,000 miles. The charge is about $15 a minute.

A Tremendous Power

Wireless and Airplanes Bring Relief Quickly When Required.

Recent dispatches to the New York Times state that Great Britain is proud of the men of the Royal Air Force who flew, repeatedly to Kabul, the Afghan capital. From Peshawar, on the Indian frontier, a distance of about 140 miles, over dangerous territory, they brought to safety all the women and children of the foreign legations. Nor is that praise unjustified, for the feat of flying over the rugged mountain masses, with the certain prospect of death if the motors failed either in the crash or at the hands of wild and fanatical tribesmen, well deserves the Victoria Cross. But to the heroes of the Royal Air Force the duty came casually as part of the day's work. The story reminds the world, still but dimly conscious of the transformation that aviation has wrought, that no more can the outposts of civilization go without relief. By wireless comes the news of danger; by air goes the essential aid. Savagery and treachery are robbed of a power which used to make them dreaded. The airplane motor becomes an instrument of mercy and security not paralleled by any other.

What a pity that Lord Roberts was not alive to read of the rescues of Kabul. Of all living men Rudyard Kipling can best appreciate what that might meant, and there are still some survivors of the march to Kandahar that gave Lord Roberts the title of his first peerage, who remember what a relief expedition to Afghanistan meant in the old days. "Bobs" had heard the skirl of the bagpipes at Lucknow, and when the glow news came to him at Simla of the massacre of the British mission under Major Cavagnari at Kabul he entered upon that famous campaign which won him his undying glory. But his march from Sherpur to Kandahar with 10,000 troops, though one of the most rapid in history, required 22 days for the 313 miles between. Now the planes can at least render aid to the beleaguered at that distance in about three hours. The "little red-faced man," who as Kipling made Thomas Atkins say, "rides the biggest horse he can," lived long and fought manfully in his lifetime. But the army in India would like to have heard him say what he thought about the flight to Kabul.

Now comes the suggestion that the League of Nations should maintain an air force for just such errands as these. But whether anything comes of that or not, events have proved, the Times comments, that the British army can take care of such situations.—St. Thomas Times-Journal.

A Real Literary Find

The New York Times says that one of the greatest rarities in United States literature, a first edition of Edgar Allen Poe's "The Murders of the Rue Morgue," has been found in a pile of old books which a second-hand dealer bought for a trifle.

Before news of the discovery became public, however, the volume was bought for $25,000 by a New York book collector.

COMPLEXION IMPROVED QUICKLY

CARTER'S LITTLE LIVER PILLS

Look Fit! Be Alive! Get rid of that pasty, sallow, blemished complexion! Instead of spending many dollars on fancy creams and skin lotions, buy a 25c pkg. of Carter's Little Liver Pills and remove the constipation poisons. Your skin will be quickly cleared, and your health improved. All Druggists 25c and 75c red pkgs.

CARTER'S LITTLE LIVER PILLS

Last Word In Cruisers

Germany's Latest Ship Makes Product of Other Countries Obsolete

According to the description which Hector C. Bywater, the Baltimore Sun's special correspondent gives, the new German armored cruiser Ersatz Preussen is a triumph of concentrated power. Keeping within the narrow limit of 10,000 tons for armored ships imposed upon her by the treaty of Versailles, Germany has constructed a ship which has the fighting effectiveness of a dreadnought, the speed of a cruiser and the hitherto unheard-of cruising radius of 10,000 miles. In addition, the new cruiser has other novel features which add immensely to its strength, and altogether it represents a production that tends to make the latest ships of other countries immediately obsolete.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, "South Monaghan, Ont., says: "We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta's Farm Wealth

The Calgary Herald says that in 1906 the Province of Alberta had a farm wealth which was estimated at $50,000,000, while in 1927 it had jumped to $338,161,458. And while it produced about 6,000,000 bushels of wheat in the former year, in the latter it yielded 162,000,000 bushels. We wonder what 1947 will show!

Chemists are now trying to make artificial cotton from wood fibre.

FOR SALE—Fully equipped farm of seven quarter sections in the Lender district. $5,000,00 will handle; balance half crop payments. Owner retiring. Apply to S. W. Kosten, Lender, Sask.

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

THE OLD, RELIABLE

Use Gillett's Lye to MAKE YOUR OWN SOAP and for cleaning and DISINFECTING

Gillett's Lye Protects Your Health and Saves Your Money

Not To Be Despised

Northern Part of Canada Is Rich in Resources

Between the Atlantic and Pacific coasts of the North American continent curious parallelisms are found, as striking in their way as are the rocky islets of the Bass and Ailsa Craig on the east and west coasts of Scotland. Two considerable islands, Vancouver and Newfoundland, form the ocean outposts of the continent and the northeast and northwest extremities of the continent, once under-estimated and even despised, are now known to be rich in mineral and other resources and possibilities.

When the United States purchased the Russian holdings on the American mainland, including what is now known as Alaska, for $7,200,000, the transaction met with much cheap ridicule and was promptly dubbed "Seward's Folly" by the quidnuncs of that day. The peninsula, then practically unknown, was reputed to be cold, sterile and barren and a mere extension of the wilderness of perpetual snow and ice that formed the popular conception of the Canadian northwest. Years elapsed before modern methods of exploration revealed the wealth that lay behind its forbidding exterior.

Very similar is the history of the huge peninsula between the Atlantic and Hudson's Bay, now forming Labrador and the hinterland of the province of Quebec. Newfoundland, adjudged the fortunate possessor of Labrador, has discovered it to be rich in potential wealth. Yet 70 years ago it was described by Professor Hind as "a lofty tableland, in many parts thickly strewn with boulders and everywhere bleak and sterile." But in the Hamilton river falls it holds one of the greatest water powers on the continent, and good reason exists for believing it to be rich in minerals.

The eastern and western horns of the North American continent, neglected for a century or more, are much alike and in a fair way to become priceless possessions of the people who have sovereignty over them.

Constitutes a Saving

With a barn full of alfalfa or good clover hay, one need not pay out much money in the purchase of protein-rich concentrates. Some claim that at present prices good alfalfa hay is cheaper than bran for growing stock and the dairy herd.

Women Doctors Coming

A number of women doctors, including one specially trained in treatment of mental cases, will be brought to Alberta from England, it is announced by Hon. George Hoadley, minister of health.

Working On Serum To Conquer Pneumonia

Medical Research Making Progress in Battle Against Disease

It is interesting to know that medical research in regard to pneumonia has progressed so far as to give hope that at least half the battle against this deadly disease may soon be won. There are probably more prominent men taken off by pneumonia than by any other disease.

There are four different types of pneumonia and the new serum, if successful, will be useful against only two of them. Dr. W. H. Park director of laboratories of the New York department of health, has stated that surprising results have been obtained in experiments with the serum. Doctor Park and Doctor Rosenau, who has been associated with the work also, are both bacteriologists of high standing.

All those who have been connected with the work speak with reserve as to the progress that has been made. That is natural with men who follow strictly scientific methods and assume nothing without actual demonstration. Health authorities in eastern Canada are very hopeful, however. They know that there will be no secret about the serum and they suggest that it can be manufactured in Canada and made available to the physicians of this country.

So great will be the gain and so great the saving of human life if this serum proves effective against even 50 per cent. of the cases of pneumonia—or in preventing that proportion of the cases—that the public dare not assume that the thing has been accomplished—until the actual testing of the treatment has taken place.

Eating And Health

Nine Rules Which Should Be Adopted by Everyone

According to advices from authoritative quarters, in order to be healthy and to enjoy long life, it is necessary to observe the rules:

The question of what to eat, it is asserted, does not enter into this phase of health procedure. According to the health specialists, the majority of people under human beings accomplish this and the result is that they suffer from various minor illnesses and in any event suffer discomfort.

The following rules should, it is advised, be adopted by anyone:

1. Never eat when you are tired
2. Never eat when you are upset by worry or excitement.
3. Never eat when you are going to do things that are upsetting.
4. Eat sparingly anything you like when you are hungry.
5. Do not think you must have three meals a day.
6. Do not force a child to eat when he does not want food.
7. Keep a child out of excitement as much as possible.
8. Do not scold him at meal time.
9. See to it that he gets plenty of rest.

"Now, boys," asked the schoolmaster, "what do you know about Hamlet's uncle?"

"Please, sir, he was better than anyone else at shooting birds," replied one of the boys.

"Indeed! What makes you think that?" asked the teacher.

"Well, sir, I read in a book that he 'did murder most foul.'"

Music While You Wait

Impatient motorists who might otherwise "cuss out" the main traffic tower at Orlando, Fla., when the red light flashes on do not mind the delay so much since four huge amplifiers were installed to broadcast entertainment, and the traffic cop on duty gets a cheery wave from drivers instead of stony stares.

Seek Russian Colony In Siberian Wilds

Has Been Cut Off from Civilization for 400 Years Is Belief

The life and thought of the 16th century, scientists at Moscow believe, have been preserved by a colony of Russians cut off from the rest of humanity for about 400 years.

A well equipped expedition, headed by Uri D. Chirikin, is being sent by the academy of science in Leningrad to find the little "lost world" somewhere in the uncharted wilderness of Yakutia, northeastern Siberia. It is hoped the expedition will yield valuable information about the customs and daily life of Russia several centuries ago.

Legends about the existence of such a chip of humanity have been prevalent among the natives of northeastern Siberia for at least 100 years. Only two apparently trustworthy reports, however, have reached the civilized world in this generation.

Before the revolution, a political exile, M. Zinzinoff, claimed to have penetrated ice-bound fastnesses to the lost colony. He told of a people speaking ancient Russian, totally unaware of anything that has happened in the world since the 16th century and scarcely aware of the existence of other human beings. More recently a Yakut named Arosin came out of the north with a tale of a Russian tribe leading a clean, moral and religious life.

Both reports agreed in placing the colony somewhere far towards the mouth of the Indigir river, where it empties into the North Polar sea.

Arosin reported that the colony contains only about 200 persons. The theory advanced in scientific circles here was that the original settlers must have been far more numerous to have survived so long in the course of centuries against such unfavorable natural conditions. Now apparently, the tribe is on the verge of extinction and the expedition may arrive just in time, before the last memory of the tribe disappears.

Great numbers of Russians fled to the inaccessible parts of Siberia in the 16th century, to escape political persecution. It is not unlikely that the lost tribe represents the remnants of such a group of refugees.

Highest City In World

La Paz, Bolivia, Is 12,470 Feet Above Sea Level

La Paz, Bolivia, where the war clouds have been lowering of late, is the loftiest capital in the world, for it stands on a mountain-top 12,470 feet above sea-level. This is 2,000 feet higher than Quito, in Ecuador and 4,000 feet higher than Mexico City. Its nearest rival for height is the far-distant Lhasa, which stands at an altitude of 11,830 feet. The mean temperature of La Paz is 50 degrees Fahrenheit, but it is nevertheless really warm there except in the sunshine, and the cold nights are unrelieved by fireside comforts, for the simple reason that the folk have nothing to burn, there being neither coal nor trees in the desolate mountainous regions around the city.

That Kind of a Player

Jones called to see his friend Smith, and, while waiting, in came little Miss Smith. Jones sat down at the piano and played something he thought would appeal to the child. When he finished, he turned around and said: "Well, what do you think of that?"

"I can't play either," was the unexpected reply.

Young Doctor—"Just think! Six of my patients recovered this week!"

Old Doctor—"Serve you right. You spend too much time at the club!"

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any druggist.

Dairying In Holland

Industry Governs Economic Life, Says Canadian Trade Commissioner

The dairying industry is the backbone of Dutch economic life, writes J. C. Macgillivray, Canadian trade commissioner in Rotterdam, in the Commercial Intelligence Journal. There are 100,000 hands employed in milch cattle breeding alone. In addition to these figures there are the employees of over 900 butter and cheese factories and the persons engaged in the distribution of the yearly production of 3,500,000,000 kilos of milk and its derivations.

Holland is the largest exporter of cheese in the world. The Dutch dairy factories may be classified as co-operative and non-co-operative. Of the former there are 617, divided as follows: Butter factories, 243; butter and cheese, 149, cheese only, 39; milk products only, 17; butter, cheese and milk products, 149. For the non-co-operative factories these figures are, respectively, 17, 45, 1, 57 and 187, making a total of 310.

Recipes For This Week

(By Betty Barclay)

Beef and Pumpkin Left-Over

2 cups left-over beef roast, copped fine.
1 cup cooked pumpkin.
2 tablespoons sugar.
½ teaspoon salt.
4 small crackers, rolled fine.
1 egg.
½ cup milk.
¼ teaspoon cloves.
2 tablespoons butter.

Mix all together and heat. Pour into greased baking dish, dot with butter and brown.

Chicken a la King

½ green pepper, shredded.
½ pound mushrooms.
3 tablespoons butter.
6 tablespoons flour.
2 cups evaporated milk.
2 cups chicken broth.
Salt.
Pepper.
3 cups cold chicken, diced.
½ pimiento, shredded.

Cook pepper and mushrooms, if they are raw, slowly in butter 5 minutes. Cover while cooking. Remove mushrooms and pepper from fat, add flour, milk, broth and seasonings. Cook 5 minutes over a low flame, stirring to keep smooth. Add chicken, mushrooms, pimiento and pepper and reheat in double boiler to prevent curdling. Yield: 8 servings.

A New Explanation

Policeman—"How do you account for having all these things in your pockets?"

Suspected Person—"Well, you see, officer, we ain't got no sideboard at home."

The chief products of the Cape Verde Islands are coffee, hides, and millet.

400,000 Women Report Benefit

by actual record

"Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"

A questionnaire enclosed with every bottle of medicine has brought, to date, over 400,000 replies. The overwhelming majority—in fact, ninety-eight out of a hundred—says, "Yes." If this dependable medicine has helped so many women, isn't it reasonable to suppose that it will help you too? Get a bottle from your druggist today.

Amateur Discovers Comet

Find Was Confirmed by Cape Town Union Observatory

An amateur astronomer living at Rosebank, a small community near Cape Town, South Africa, distinguished himself recently by the discovery of a new comet. His "find" was confirmed immediately by officials of the Union Observatory in Cape Town. The comet could not be seen with the naked eye. It travelled slowly, and had no tail. The astronomers of the observatory plan to name it the Forbes comet, after its discoverer, and as encouragement to amateurs.

Canada's Silk Industry

Latest Report Gives Gross Value as About Ten Million

In the past 11 years the silk industry of Canada has increased 551 per cent. in the number of establishments, 251 per cent. in number of employees, 496 per cent. in salaries and wages, and 303 per cent. in gross value of products. Since 1924 the capital investment has increased from $5,744,502 to $22,227,818 in 1927. The annual gross value of the Canadian silk industry is nearly $10,000,000, according to the latest available figures.

Announcers of the British Broadcasting Company take singing lessons regularly to help them polish their voices for speaking into the microphone.

Husband (fiercely)—"I'll show you who's running this house."

Wife—"You can't. It's her day out."

Little Helps For This Week

When He giveth quietness, who then can make trouble. Job 34.29.

Let Thy mercy's wings be spread
Over me; keep me close to Thee
In the peace Thy love doth shed
Let me dwell eternally.
Be my All; in all I do
Let me only seek Thy will
Where the heart to Thee is true,
All in peaceful, calm and still.
—A. H. Francke.

All the peace and favor of the world cannot calm a troubled heart; but where the peace is which Christ gives, all the trouble and disquiet of the world cannot disturb it. All outward distress to such a mind is but as the rattling of the hail upon the tiles to him that sits within the house at a sumptuous banquet.
—Archbishop Leighton.

Agricultural machinery and petroleum products shipments were unusually heavy in 1928. Approximately 3,000 reaper-threshers were in use in Saskatchewan and, in most cases, were reported satisfactory.

for Coughs and Colds

A Pleasant Sip-Instant Relief

There is an effective way to pleasantly relieve that distressing Cough. Buckley's Mixture is delightful and "friendly". Yet it acts like a flash in clearing the throat and chest. One dose stops coughing—and there are 48 doses in a 75-cent bottle! All druggists sell it under a money-back guarantee.

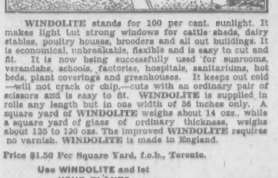
WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH



THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip.—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 120 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight

RUSSEL DUFFIELD Prop.

The Battle of January:

January was a momentous month for wheat producers the world over, Canadian farmers had delivered nearly four hundred million bushels of wheat, Argentina and Australia were commencing the delivery of unusually large crops. There was an immence visible supply of wheat. The market commenced to sag. The one optimistic feature in a rather gloomy picture was the Canadian Wheat Pool, Just what the Pool stood for is told in candid language by George Broomhall, the British grain authority, in "Milling.":

"Prices were put down on the plea that Argentina must sell more of her new crop, and, in fact, shippers did put out lower offers, and some Canadian sellers followed the downward lead.

"But it was soon found that the Canadian Pool refused to offer or sell at the lower prices, and, of course, this gave Argentine shippers courage to work for a reaction.

"This action of the Canadian Pool also gave buyers confidence, and they not only found they needed wheat, but that they could pay better rates for it.

"As long as sellers were willing to "cut" prices, buyers were quite prepare to stand back and let them do still more "cutting," and quite possibly there might have been a bad slump had not the Canadian Pool taken a strong stand.

"The Canadian Pool Manager

certainly deserve credit for courageous handling of a difficult situation, and their action proves that farmer members of the Pool would not agree to low prices at this period of the season.

"The lesson of the price movements of wheat in the past week is that emphasis must be given to the power of strong holders to maintain prices,

"Past experience showed that a crowd of weak holders was almost at the mercy of buyers in times of plenty. "I think all must now recognize the commanding position of the Canadian Pool, and the readiness of Argentine shippers to follow a strong upward lead."
